- Unique features
- Glass-filled nylon

shindaiwa Best in the Business

Easy breakdown

- Only 6 basic components
- No springs to fall out if taken apart

shindaiwa Best in the Business

Low-Vibration

- Top (winder) serves as vibration-dampening disk
- Rigid control of dimensions, molding process

shindaiwa Best in the Business

Replaceable Eyelets

- Diecast eyelets shaped for less line breakage
- Slotted for faster loading if head disassembled

shindaiwa Best in the Business

No More Line-Welding

- Separate spool for each line
- Automatic Tensioning feature eliminates welding and reduces vibration!

shindaiwa Best in the Business

Large Wear Surface At Base

- Less frequent replacement of bump knob
- Less chance of scalping turf

shindaiwa Best in the Business

Better Sealing

- Double-wall design prevents internal debris buildup
- Maximizes rigidity, strength

shindaiwa Best in the Business

#1 Feature: Fast Loading

- Line can be loaded externally without removing trimmer head from unit
- Less than 30 seconds to load!
- Feed single strand thru head to load

shindaiwa Best in the Business

Line Loading Steps

- Align top cover (winder) arrow with eyelet
- Feed 1 line into head; equal lengths
- Turn knob counterclockwise

shindaiwa Best in the Business

Fastest Line Loading

- For fastest line loading, load right off the spool!

shindaiwa Best in the Business
